Ms. Berner,

I checked back with DHA and my intuition was correct. The database had no information on Mr. Edwards therefore no screenshots were available to provide.

Subject: [Non-DoD Source] RE: Document request - SSCA

We have received the documents, thank you for sending them. After a brief review, we noticed that there were screenshots included of the search of the veteran's name yielding no results. However, we have two screenshot copies of Arla Harrell's search and none of Rollins Edwards'. I assume this was simply an oversight but if we could get a copy of Rollins Edwards' screen shot as well, that would be great.

Thanks very much,
Hannah

Ms. Yu, Ms. Berner,

I had our courier transport the documents (two requests for individual records and one request for locations for testing) you requested this afternoon. They will be or already delivered then to [REDACTED]. I couldn't send them via email because the system stated you would not be able to see encrypted emails, which we must do given they had personal identifiable as well as personal medical information. Please let me know when you received them.
