Good afternoon Cathy,

Hope you are well. Please find attached VA's responses to the questions of Ranking Member McCaskill's letter dated February 4, 2016. Included in the attached are scheduling availabilities for a briefing to you by VA officials:

- February 16, 10:00-12:00
- February 17, 10:00-12:00
- February 18, 1:00-3:30
- February 19, 1:30-3:00

Please let me know your preferred date/time or if you would like the team to propose additional availabilities.

Thanks,

Joe

Responses to Ranking Member McCaskill  
 Questions on Mustard Gas Exposure  
 Letter dated February 4, 2016

**Question 1.** Confirm whether there is a VA master file of veterans who are receiving compensation for exposure to mustard gas.

**Response:** VA compensation records are consolidated into an electronic corporate data warehouse. As of February 2016, 42 WWII Veterans are receiving compensation for mustard gas related disabilities.

**Question 2.** Confirm whether the VA has a comprehensive list of mustard gas testing sites and if so, whether the comprehensive list was ever sent to veterans who may have been exposed.

**Response:** The letter sent to Veterans included a list of 16 testing sites that were identified by the Department of Defense (DoD). If a Veteran alleges testing at a site other than those known locations, VA forwards the information to DoD and requests verification of testing at the site.

Please see the chart below for the 16 sites; Camp Lejeune is listed under both Army and Navy.

<b>ARMY</b>	<b>NAVY</b>
Bushnell, Florida	Camp Lejeune, North Carolina
Camp Lejeune, North Carolina	Charleston, South Carolina
Camp Sibert, Alabama	Great Lakes Naval Training Center, Illinois
Dugway Proving Ground, Utah	Hart's Island, New York
Edgewood Arsenal, Maryland	Navy Training Center, Bainbridge, Maryland
Naval Research Lab in Washington, DC	Naval Research Laboratory, Virginia
Ondal, India	Naval Research Lab in Washington, DC
Rocky Mountain Arsenal, Colorado	USS Eagle Boat No. 58
San Jose Island, Panama Canal Zone	

**Question 3.** Confirm whether every veteran who is acknowledged to have been exposed to mustard gas is entitled to a certain level of service connection.

**Response:** Exposure to mustard gas is not a disability and does not necessarily result in development of a disability. However, for Veterans who participated in full body exposure testing and subsequently develop any of the 14 disabilities listed in VA's regulations at 38 C.F.R. § 3.316, VA presumes service connection for these disabilities, with very limited exceptions.

**Question 4.** Provide the VA criteria for what documents a veteran needs to produce to prove that he was exposed to mustard gas.

**Response:** VA primarily relies on DoD to verify a claimed exposure event. If a Veteran is not listed in DoD's database, VA will send the information below to DoD for verification of the claimed in-service exposure:

1. The Veteran's full name, service number, social security number, and full organizational designation (unit, company, division, etc.) at the time of alleged exposure(s)
2. The number of alleged exposures
3. The date of the alleged exposure(s) (month and year)
4. The geographical location of the alleged exposure(s)
5. The Veteran's account of the type of activity engaged in at the time of each alleged exposure, such as training or involvement in a test or experiment
6. Details from the Veteran regarding the alleged exposure, including: the length of time the Veteran was exposed and the procedures that were followed before, during, and after the exposure; the effect of the exposure on the Veteran's body; and whether the Veteran received medical treatment following exposure
7. A copy of the Veteran's military personnel file, and
8. Any 3-inch by 5-inch index card in the service records documenting exposure

This guidance is found in VA's M21-1 Adjudication Procedures Manual. If a Veteran has evidence that he or she believes proves exposure to mustard gas during service, and DoD cannot verify that claimed exposure, the Veteran can petition the service department to correct the military record by filing DD Form 149 along with the evidence. Forms and guidance on correcting military records are available at <http://www.archives.gov/veterans/military-service-records/correct-service-records.html>.

**Question 5.** Provide information on the circumstances in which a veteran's records may be missing, other than the National Personnel Records Center fire of 1973.

**Response:** The July 12, 1973, fire at the National Archives & Records Administration (NARA) National Personnel Records Center (NPRC) destroyed approximately 16-18 million Veterans' Official Military Personnel Files (OMPFs). Most of the destroyed records were Army and Air Force OMPFs containing personnel records and military service treatment records (STRs). Further information on the fire is available at [archives.gov](http://www.archives.gov). Besides the fire in 1973, VA is not aware of any large-scale events which would impact the availability of Veterans' personnel and medical records.

The location of a Veteran's records may depend on the Veteran's period of service, branch of service, and VA claim history. Electronic tracking systems have long been in place for records in VA or NARA's custody. NARA and VA are dependent on the military service departments for providing Veterans' records to the designated location after discharge from active duty. Additionally, some Servicemembers retained their original service records at discharge from active duty.

**Question 6.** Provide copies of all disability claim approvals and denials related to mustard gas exposure.

**Response:** Due to privacy laws, VA cannot provide you with unrestricted access to the requested files as they contain personally identifiable information (PII). However, the attached spreadsheet contains issue-level data with PII redacted. This spreadsheet covers issues claimed by 774 WWII Veterans in association with mustard gas exposure beginning in 2005, which is when VA consolidated processing of Mustard Gas claims at the Muskogee Regional Office and began specifically tracking these claims. The spreadsheet also includes data on claims for increased evaluations for conditions determined to be related to mustard gas. VA consolidated processing to improve consistency and accuracy of decisions on these complicated claims, which are now handled in the Muskogee Regional Office's Special Operations Team.

**Question 7.** Provide further information regarding a 2005 Veterans Health Administration mailing that was sent to veterans exposed to mustard gas, including a copy of the mailing and information on how many veterans received the mailing.

**Response:** The 2005 mailing was conducted by the Veterans Benefits Administration (VBA). VBA worked with DoD to identify Servicemembers who were exposed to mustard gas or lewisite. In March 2005, VBA mailed mustard gas notification letters to 301 veterans and 78 surviving spouses. VA invited Veterans to file disability compensation claims for any condition related to service, including exposure to mustard agents and Lewisite. The mailings also included information on medical and other benefits to which these veterans or their survivors may be entitled, as well as telephone numbers for VA and DoD. A copy of the letter is attached.

**Question 8.** Provide a briefing for Aging Committee staff regarding the VA's rate of denial of mustard gas disability claims, including a detailed breakdown of the

disability claims received and denied for each year from 2005 to 2015 and the official reason for the denial.

**Response:** VA has received mustard gas disability claims from 774 unique WWII Veterans since October 1, 2005, when we began specifically tracking these claims. These WWII Veterans claimed entitlement to service connection for 1,562 issues. We were able to grant service connection for 135, or approximately 9.5 percent, of those claimed issues. We were unable to grant the remaining 1,427 claimed issues. The chart below provides the denial reasons coded into VA's electronic records for each denied issue:

<b>SC Denied Issues Reasons</b>	<b>Total</b>
<b>Constitutional/Developmental Abnormality</b>	<b>3</b>
<b>No Diagnosis</b>	<b>106</b>
<b>Not Aggravated by Service</b>	<b>6</b>
<b>Not Established by Presumption</b>	<b>330</b>
<b>Not Incurred/Caused by Service</b>	<b>969</b>
<b>Not Secondary</b>	<b>13</b>
<b>Total</b>	<b>1,427</b>

Tom Murphy, Director of Compensation Service, and Brad Flohr, Senior Advisor for Compensation Service, are available to provide a briefing during the following times:

- February 16, 10:00-12:00
- February 17, 10:00-12:00
- February 18, 1:00-3:30
- February 19, 1:30-3:00

**Question 9.** Provide a briefing for Aging Committee staff with representatives from the Muskogee Regional Benefit Office regarding the consolidation and processing of disability claims.

**Response:** Jason McClellan, Director of the Muskogee Regional Office, is available to answer questions on the consolidation and processing of disability claims during the briefing with Tom Murphy and Brad Flohr.

Dear Mr. [Redacted]

We made a decision regarding your entitlement to VA benefits.

Your claim was processed under the Fully Developed Claim Program.

This letter tells you what we decided. It gives the evidence used and reasons for our decision. We have also included information about what to do if you disagree with our decision and who to contact if you have questions or need assistance.

**Your current benefit payment will continue unchanged.**

**What We Decided**

We made the following decision(s):

Issue/Contention
endocarditis
Explanation
<ul style="list-style-type: none"> <li>• The claim for service connection for endocarditis is considered reopened. However, the evidence continues to show this condition was not incurred in or aggravated by military service.</li> <li>• VA rating decisions dated December 10, 1996 and September 10, 2005 denied service connection for endocarditis due to mustard gas exposure as there was no evidence of full body exposure to mustard gas in service. On June 26, 2015, we invited you to request a review of your previously denied mustard gas claim. On July 6, 2015 we received your positive response. We made a request for verification of your exposure to mustard gas to the Department of Defense on June 25, 2015. In response the US Department of Defense</li> </ul>

Chemical Biological Warfare Exposure System, stated there is no record of you being exposed to mustard gas in service. You identified treatment at the Erie, PA VAMC from 1991. VA Outpatient treatment records from Erie, PA VAMC from October 2, 1992 to August 11, 2003 were previously received and received by VA rating decision dated September 10, 2005. On October 9, 2015 you indicated that you did not want the VA to pursue obtaining the Erie, PA VAMC records from 1991. Your service treatment records do not contain complaints, treatment, or diagnosis for this condition. The evidence does not show an event, disease or injury in service.

Issue/Contention
lung condition and bronchial tube condition previously claimed as asthma and also claimed as breathing condition

- Service Treatment Records
- You identified treatment at the Erie, PA VAMC from 1991. VA Outpatient treatment records from Erie, PA VAMC from October 2, 1992 to August 11, 2003 were previously received and received by VA rating decision dated September 10, 2005. On October 9, 2015 you indicated that you did not want the VA to pursue obtaining the Erie, PA VAMC records from 1991.

### REASONS FOR DECISION

#### **1. Service connection for endocarditis.**

VA rating decisions dated December 10, 1996 and September 10, 2005 denied service connection for endocarditis due to mustard gas exposure as there was no evidence of full body exposure to mustard gas in service. On June 26, 2015, we invited you to request a review of your previously denied mustard gas claim. On July 6, 2015 we received your positive response. We made a request for verification of your exposure to mustard gas to the Department of Defense on June 25, 2015. In response the US Department of Defense Chemical Biological Warfare Exposure System, stated there is no record of you being exposed to mustard gas in service. You identified treatment at the Erie, PA VAMC from 1991. VA Outpatient treatment records from Erie, PA VAMC from October 2, 1992 to August 11, 2003 were previously received and received by VA rating decision dated September 10, 2005. On October 9, 2015 you indicated that you did not want the VA to pursue obtaining the Erie, PA VAMC records from 1991.

Your service treatment records do not contain complaints, treatment, or diagnosis for this condition. The evidence does not show an event, disease or injury in service.

The claim for service connection for endocarditis is considered reopened. However, the evidence continues to show this condition was not incurred in or aggravated by military service.

**2. Service connection for lung condition and bronchial tube condition previously claimed as asthma and also claimed as breathing condition.**

VA rating decisions dated December 10, 1996 and September 10, 2005 denied service connection for lung condition and bronchial tube condition previously claimed as asthma and also claimed as breathing condition due to mustard gas exposure as there was no evidence of full body exposure to mustard gas in service. On June 26, 2015, we invited you to request a review of your previously denied mustard gas claim. On July 6, 2015 we received your positive response. We made a request for verification of your exposure to mustard gas to the Department of Defense on June 25, 2015. In response the US Department of Defense Chemical Biological Warfare Exposure System, stated there is no record of you being exposed to mustard gas in service. Dear Mr. [REDACTED]

We made a decision on your claim for service-connected compensation received on January 20, 2011, to include our telephone conversations dated May 1, 2012.

Although we have not changed the way we consider and decide claims, we have changed the way we inform you of our decision. This single streamlined notice includes the essential information previously contained in a separate rating decision.

This letter constitutes our decision based on all issues we understood to be specifically made, implied, or inferred in that claim.

This letter tells you about what we decided. It includes the evidence used and reasons for our decision. We have also included information about what to do if you disagree with our decision, and who to contact if you have questions or need assistance.

**What We Decided**

*Please see the enclosure for more information regarding the evidence considered.*

We determined that the following conditions were not related to your military service, so service connection couldn't be granted:

Medical Description	Denial Reason
Squamous cell carcinoma claimed as skin cancer associated with Mustard Gas	<ul style="list-style-type: none"> <li>The evidence does not show an event, disease or injury in service.</li> <li>The evidence does not show the location(s) of your military service, or the events you experienced therein, qualify for the presumption of service connection for Squamous cell carcinoma claimed as skin cancer associated with Mustard Gas.</li> </ul>

*[Handwritten initials]*

*Explanation*

Although we denied your claim for this condition, we acknowledge receipt of your private medical opinion from Dermatology Group, which diagnosed your current disability. You claimed exposure to Mustard Gas from loading barrels of it and from testing, however, we received a negative response from the Department of Defense after a review of your personnel records. Full body exposure to nitrogen or sulfur mustard or Lewisite during active military service together with the subsequent development of the following conditions is also sufficient to establish service connection for that condition: chronic form of laryngitis, bronchitis, emphysema, asthma, or chronic obstructive pulmonary disease. In addition, full body exposure to nitrogen mustard during military service together with the subsequent development of acute nonlymphocytic leukemia is sufficient to establish service connection for that condition. Entitlement to service connection based on exposure to mustard gas is not established because the evidence does not show full body exposure to mustard gas during active military service. There is no basis in the available evidence of record to establish service connection for blisters and residual scars on arm. This condition did not happen in military service, nor was it aggravated or caused by service.

Medical Description	Denial Reason
Blisters and residual scars on arm associated with Mustard Gas	<ul style="list-style-type: none"> <li>• The evidence does not show a current diagnosed disability.</li> <li>• The evidence does not show an event, disease or injury in service.</li> <li>• The evidence does not show the location(s) of your military service, or the events you experienced therein, qualify for the presumption of service connection for Blisters and residual scars on arm associated with Mustard Gas.</li> </ul>

*Explanation*

You claimed exposure to Mustard Gas from loading barrels of it and from testing, however, we received a negative response from the Department of Defense after a review of your personnel records. Full body exposure to nitrogen or sulfur mustard or Lewisite during active military service together with the subsequent development of the following conditions is also sufficient to establish service connection for that condition: chronic form of laryngitis, bronchitis, emphysema, asthma, or chronic obstructive pulmonary disease. In addition, full body exposure to nitrogen mustard during military service together with the subsequent development of acute nonlymphocytic leukemia is sufficient to establish service connection for that condition. Entitlement to service connection based on exposure to mustard gas is not established because the evidence does not show full body exposure to mustard gas during active military service. There is no basis in the available evidence of record to establish service connection for blisters and residual scars on arm. This condition did not happen in military service, nor was it aggravated or caused by service nor is there evidence of a clinical diagnosis of this condition.

We enclosed a VA Form 21-8764, "Disability Compensation Award Attachment-Important Information," which explains certain factors concerning your benefits.

### What You Should Do If You Disagree With Our Decision

Dear Mr. [REDACTED]:

We made a decision on your claim for service connected compensation received on March 25, 2010.

We also considered information received from our telephone conversation with you on March 28, 2011, and August 3, 2011.

This letter tells you about your entitlement amount and payment start date and what we decided. It includes a copy of our rating decision that gives the evidence used and reasons for our decision. We have also included information about additional benefits, what to do if you disagree with our decision, and who to contact if you have questions or need assistance.

**Your Award Amount and Payment Start Date**

Your monthly entitlement amount is shown below:

Monthly Entitlement Amount	Payment Start Date	Reason For Change
\$2,823.00	Apr 1, 2010	Compensation Adjustment
2,924.00	Dec 1, 2011	Cost of Living Adjustment

We are paying you as a veteran with one dependent. Your payment includes an additional amount for your spouse, Martha. *Let us know right away if there is any change in your marital status (for example, death, divorce, annulment).*

**You Can Expect Payment**

Your payment begins the first day of the month following your effective date. You will receive a payment covering the initial amount due under this award, minus any withholdings. Thereafter, payment will be made at the beginning of each month for the prior month. For example, benefits due for May are paid on or about June 1.

The Treasury Department has mandated (31 CFR Part 208) that all Federal benefits be released via electronic funds transfer or Direct Express ® Debit MasterCard® issued by Comerica Bank.

Your payment will be directed to the financial institution and account number that you specified. To confirm when your payment was deposited, please contact that financial institution.

*If this account is no longer open,  
please notify us immediately.*

### What We Decided

We determined that the following condition(s) was/were related to your military service, so service connection has been granted:

Medical Description	Percent (%) Assigned	Effective Date
Chronic obstructive pulmonary disease claimed as pulmonary fibrosis and severe lung problems associated with Mustard Gas	100%	Mar 25, 2010

We determined that the following condition(s) was/were not related to your military service, so service connection couldn't be granted:

Medical Description
Heart condition associated with chronic obstructive pulmonary disease claimed as pulmonary fibrosis and severe lung problems
Hypertension associated with Mustard Gas

We assigned a permanent 100% disability evaluation for your service connected disability/disabilities effective March 25, 2010.

9  
[REDACTED]  
[REDACTED]

No examination will be scheduled in the future for your permanent and total disability/disabilities.

We did not take issue with individual unemployability because you have been granted a schedular 100 percent rating.

Basis eligibility to Dependents' Educational Assistance is established from March 25, 2010.

We determined that you are entitled to both disability pension and service connected compensation. Under VA law you can't receive both benefits at the same time. We have granted service connected compensation as the greater benefit. However, you may choose (or 'elect') to receive either benefit program at any time.

We have enclosed a copy of your Rating Decision for your review. It provides a detailed explanation of our decision, the evidence considered, and the reasons for our decision. Your Rating Decision and this letter constitute our decision based on your claim received on March 25, 2010. It represents all claims we understood to be specifically made, implied, or inferred in that claim.

We enclosed a VA Form 21-8760, "Additional Information for Veterans with Service-Connected Permanent and Total Disability," which explains certain factors concerning your benefits.

We enclosed a VA Form 21-8764, "Disability Compensation Award Attachment-Important Information," which explains certain factors concerning your benefits.

### **Evidence We Need From You to Complete Your Claim For Dependents**

We are currently paying you for your spouse, Martha. If you have any additional dependents, please complete and return the enclosed VA Form 21-686c, Declaration of Status of Dependents. *If you have no additional dependents, there is no need to return the form.*

### **When and Where to Send the Information or Evidence**

Send the information or the evidence to the address at the top of this letter. Please put your full name and VA file number on the evidence.

We may be able to pay you from the date we received your claim, if we receive the information or evidence within one year from the date of this letter and we decide that you are entitled to VA benefits. If we do not receive the evidence within one year from the date of this letter, we can only pay you from the date we receive the evidence.

## Are You Entitled to Additional Benefits?

The Department of Education provides a program for Veterans to discharge their student loans. To be eligible, the Veteran must have a service-connected disability(ies) that is 100% disabling, or be totally disabled based on an Individual Unemployability determination. For more information concerning this benefit, please contact the U.S. Department of Education, Disability Discharge Loan Servicing Center P.O. Box 5200 Greenville, TX 75403-5200 or toll free at 1-800-433-7327. Visit there website at <http://ifap.ed.gov/disabilitydischarge/va.html>.

You may be eligible for government life insurance if you

- were released from active duty after April 25, 1951,
- are in good health (except for any service connected conditions), and
- apply within two years of this notification of your disability rating.

If you are totally disabled, you may be eligible to have your government life insurance premiums waived. The Insurance is called Service-Disabled Veterans Insurance (S-DVI), and you should receive a package within two weeks. This package will contain information about the insurance and an application. If you do not receive an S-DVI package, please contact the Insurance Center to request additional information. Call the Insurance toll free number, 1-800-669-8477, or visit the Insurance web site, <http://www.insurance.va.gov>, for further information about Service-Disabled Veterans Insurance.

You may be eligible for medical care by the VA health care system for any service connected disability. You may apply for medical care or treatment at the nearest medical facility. If you apply in person, present a copy of this letter to the Patient Registration/Eligibility Section. If you apply by writing a letter, include your VA file number and a copy of this letter.

### REDUCE OR ELIMINATE YOUR MEDICAL CO-PAYMENTS

If you receive care at a VA medical facility, **please call our Health Benefits Call Center at 1-877-222-VETS (8387) or notify your local VA medical center** of this change in your compensation benefits. This rating decision may reduce or eliminate your co-payments for your VA-provided medical care. You may also be eligible for a refund based on this rating decision. Information regarding VA health care eligibility and co-payments is available at our website [www.va.gov/healtheligibility](http://www.va.gov/healtheligibility).

[REDACTED]  
[REDACTED]

You should contact your State office of veteran's affairs for information on any tax, license, or fee-related benefits for which you may be eligible as a veteran (or surviving dependent of a veteran). State offices of veteran's affairs are available at <http://www.va.gov/statedva.htm>.

You may be eligible for service connected disability benefits at the 100% rate if you are too disabled to work because of your service connected disabilities. If you believe that you qualify, please complete and return the enclosed VA Form 21-8940, "Veteran Application For Increased Compensation Based On Unemployability."

You may be able to receive vocational rehabilitation employment services. The enclosed VA Form 28-8890, "Important Information About Vocational Rehabilitation Benefits," explains this benefit completely. To apply for this benefit, complete and return the enclosed VA Form 28-1900, "Disabled Veterans Application for Vocational Rehabilitation."

Because of the rating action described in this letter, you may be eligible to have your government life insurance premiums waived. (This doesn't apply if you have Veterans Group Life Insurance [VGLI]). *If your answer is "yes" to all of the following questions, you should contact the VA Insurance Center at the following toll free telephone number in order to request a "waiver of premiums" on your government life insurance policy. Call 1-800-669-8477.*

- Do you have an active government life insurance policy?
- Do you currently pay premiums for your government life insurance policy?
- Are you considered to be unemployable, or are you rated 100% disabled by VA?
- Were you under age 65 when you became unable to work or 100% disabled?

Your dependents may be eligible for Dependents' Educational Assistance. We are enclosing a VA pamphlet 22-73-3, "Summary of Education Benefits," which explains the program. To make a claim, complete and return the enclosed VA Form 22-5490.

Your dependents may be eligible for benefits under CHAMPVA. CHAMPVA is a health benefits program in which the Department of Veterans Affairs (VA) shares the cost of certain healthcare and supplies with eligible beneficiaries. To be eligible for the CHAMPVA program a dependent must be the spouse or child of a veteran who is permanently and totally disabled from a service-connected disability. The Health Administration Center in Denver, Colorado administers the CHAMPVA program. You should call 1-800-733-8387 if additional information is needed.

You may be entitled to Armed Forces Commissary and Exchange privileges. Honorably discharged veterans evaluated as 100 percent disabled due to service-connected disability; or, Medal of Honor recipients; or, military retirees and their dependents may qualify for entitlement to this additional benefit.

**INTRODUCTION**

The records reflect that you are a veteran of the World War II Era. You served in the Army from July 9, 1943 to March 10, 1946. You filed a new claim for benefits that was received on March 25, 2010. Based on a review of the evidence listed below, we have made the following decision(s) on your claim.

We grant service connection for a disease or disability that you currently have if this disability began in military service, was caused by some event or experience in service, or was aggravated by military service. Service connection may also be granted for specific diseases or conditions which are presumed to have been caused by service if manifested to a compensable degree (10 percent disabling) within a specified period of time, generally, one year. Based on a review of the evidence listed below, we have made the following decision(s) on your claim:

Please note that we did not take issue with individual unemployability because you have been granted a schedular 100 percent rating

### DECISION

1. Service connection for chronic obstructive pulmonary disease claimed as pulmonary fibrosis and severe lung problems is granted with an evaluation of 100 percent effective March 25, 2010.
2. Basic eligibility to Dependents' Educational Assistance is established from March 25, 2010.
3. Service connection for heart condition is denied.
4. Service connection for hypertension denied.

### EVIDENCE

- VA Form 21-41-38 received on March 25, 2010
- VA Form 21-526 received on June 1, 2010
- Notification from Department of Defense confirming full body exposure received on September 22, 2011
- Treatment reports, Dr Anhalt Lakeshore Family Care, from April 17, 2009 through March 3, 2010
- Service treatment records fire related as reported in our previous letters, only exit exam dated March 9, 1946 available for review
- Notification from VAMC of failure to report for examination received on November 25, 2011

### REASONS FOR DECISION

#### 1. Service connection for chronic obstructive pulmonary disease claimed as pulmonary fibrosis and severe lung problems.

Service connection may be granted for specific diseases or conditions which are presumed to have been caused by service if manifested to a compensable degree following military discharge. Although not shown in service, service connection for chronic obstructive pulmonary disease claimed as pulmonary fibrosis and severe lung problems has been granted on the basis of presumption.

You reported on VA Form 21-4138 that you had severe lung problems due to mustard gas exposure from testing at Edgewood Arsenal. You claimed the condition as pulmonary fibrosis on VA Form 21-526. We received a response from the Department of Defense confirming full body exposure. Although your service treatment records were not available for review, your records from Dr Anhalt dated March 3, 2010 show that you are oxygen dependent due to COPD/pulmonary fibrosis. We received notification from

VAMC that you failed to report for your compensation and pension exam, however, we were able to rate your condition from your private treatment records.

An evaluation of 100 percent is assigned from March 25, 2010, the date we received your claim.

An evaluation of 100 percent is granted whenever there is requirement for outpatient oxygen therapy.

## 2. Eligibility to Dependents' Educational Assistance under 38 U.S.C. chapter 35.

Eligibility to Dependents' Educational Assistance is derived from a veteran who was discharged under other than dishonorable conditions; and, has a permanent and total service-connected disability, or a permanent and total disability was in existence at the time of death; or the veteran died as a result of a service-connected disability. Also, eligibility exists for a serviceperson who died in service. Finally, eligibility can be derived from a service member who, as a member of the armed forces on active duty, has been listed for more than 90 days as: missing in action; captured in line of duty by a hostile force; or forcibly detained or interned in line of duty by a foreign government or power.

Basic eligibility to Dependents' Education Assistance is granted as the evidence shows you currently have a total service-connected disability, permanent in nature. The effective date is March 25, 2010, the date we received your claim.

## 3. Service connection for heart condition as secondary to the service-connected disability of chronic obstructive pulmonary disease claimed as pulmonary fibrosis and severe lung problems.

Your claim for service connection for heart condition including as due to mustard gas exposure and as secondary to lung condition is denied.

Your service treatment records were fire related and we only had your exit exam, which did not show a diagnosis of a heart condition. In addition, we did not receive a completed NA Form 13055 as requested in our previous letter. This form is used to try and obtain these records from alternate sources. Although your records from Dr Ahnult show a diagnosis of coronary artery disease and subsequent coronary bypass there is no medical evidence showing that it manifested to a compensable degree within one year of your discharge from active duty, nor evidence linking the condition to mustard gas exposure or your service connected lung condition.

Full-body exposure to nitrogen or sulfur mustard, or Lewisite during active military service together with the later development of any of the following conditions is

sufficient to establish service connection for that condition: chronic conjunctivitis, keratitis, corneal opacities, scar formation, or the following cancers: nasopharyngeal; laryngeal; lung (except mesothelioma); or squamous cell carcinoma of the skin; or a chronic form of laryngitis, bronchitis, emphysema, asthma, or chronic obstructive pulmonary disease or for acute nonlymphocytic leukemia. There is no basis to establish service connection based on mustard gas exposure since the disability at issue is not included in the list of indicated conditions. There is no basis in the available evidence of record to establish service connection for heart condition. This condition did not happen in military service, nor was it aggravated or caused by service, nor is there evidence that it manifested to a compensable degree within one year of your discharge from active duty.

Service connection may be granted for a disease or injury which resulted from a service-connected disability or was aggravated thereby. The evidence does not show that heart condition is related to the service-connected condition of chronic obstructive pulmonary disease claimed as pulmonary fibrosis and severe lung problems, nor is there any evidence of this disability during military service.

#### **4. Service connection for hypertension as a result of exposure to mustard gas.**

Your claim for service connection for hypertension including as due to mustard gas exposure is denied.

Your service treatment records were fire related and we only had your exit exam, which did not show a diagnosis of hypertension. In addition, we did not receive a completed NA Form 13055 as requested in our previous letter. This form is used to try and obtain these records from alternate sources. Although your records from Dr Ahnult show a diagnosis of hypertension there is no medical evidence showing that it manifested to a compensable degree within one year of your discharge from active duty, nor was evidence received showing the condition is related to mustard gas exposure.

Full-body exposure to nitrogen or sulfur mustard, or Lewisite during active military service together with the later development of any of the following conditions is sufficient to establish service connection for that condition: chronic conjunctivitis, keratitis, corneal opacities, scar formation, or the following cancers: nasopharyngeal; laryngeal; lung (except mesothelioma); or squamous cell carcinoma of the skin; or a chronic form of laryngitis, bronchitis, emphysema, asthma, or chronic obstructive pulmonary disease or for acute nonlymphocytic leukemia. There is no basis to establish service connection based on mustard gas exposure since the disability at issue is not included in the list of indicated conditions. There is no basis in the available evidence of record to establish service connection for hypertension. This condition did not happen in military service, nor was it aggravated or caused by service, nor is there evidence that it manifested to a compensable degree within one year of your discharge from active duty.

THE UNDER SECRETARY OF VETERANS AFFAIRS FOR BENEFITS  
WASHINGTON, D.C. 20420

MMMM DD, 2005

CSS -

NAME  
STREET  
CITY STATE ZIP

Dear Mr. NAME,

Certain documents recently declassified by the Department of Defense (DoD) show that you were exposed to mustard agents (mustard gas, sulfur mustard, nitrogen mustard) or Lewisite during your tour of service while in the Navy. This letter provides information that you may want to consider in determining whether to file a claim for benefits from the Department of Veterans Affairs (VA) based on this exposure.

### **Exposure Periods and Locations**

According to DoD, some chemical exposures occurred during combat or in the handling or destruction of chemical agents. However, most chemical exposures occurred in connection with World War II testing programs, via chamber, field, patch, drop, and syringe tests.

The following is a list of all known test, combat, and military occupational duty sites where exposures occurred:

- Bainbridge Naval Training Center, Maryland
- Bari, Italy
- Bushnell, Florida
- Camp Lejeune, North Carolina
- Camp Sibert, Alabama (1943-1944 only)
- Charleston, South Carolina
- Dugway Proving Ground, Utah
- Edgewood Arsenal, Maryland
- Hart's Island, New York
- Great Lakes Naval Training Center, Illinois
- Naval Research Laboratory, Virginia
- Ondal, India (1944 only)
- Rocky Mountain Arsenal, Colorado
- San Jose Island, Panama Canal Zone
- Naval Research Laboratory, Washington, D.C.
- *USS Eagle Boat No. 58*

Note: Some American servicemembers may have participated in Allied mustard agent testing in Finschhafen, New Guinea, and Porton Down, England.

## Compensation for Full-Body Exposure

VA may grant compensation to veterans who have certain diseases associated with **full-body exposure** to mustard agents or Lewisite during military service. This means that the entire body was exposed rather than just one or more locations on the skin, such as in a “patch test.”

DoD has confirmed that you were subjected to full-body mustard agent or Lewisite exposure during one of the following events:

- Battlefield conditions in World War I
- Field or chamber experiments to test protective clothing or equipment during World War II
- The German air raid on the harbor of Bari, Italy in 1943

## Disabilities Due to Chemical Exposure

VA has determined full-body exposure of mustard agents or Lewisite may cause certain disabilities. These include:

- (From mustard agents only) Chronic conjunctivitis, keratitis, corneal opacities, scar formation, or the following cancers: nasopharyngeal; laryngeal; lung (except mesothelioma); or squamous cell carcinoma of the skin
- (From either mustard agents or Lewisite) A chronic form of laryngitis, bronchitis, emphysema, asthma, or chronic obstructive pulmonary disease
- (From nitrogen mustard only) Acute non-lymphocytic leukemia

## Health Care

Most veterans are required to apply for enrollment to receive VA health care benefits. If you are not already enrolled with your local VA health care facility we encourage you to do so at your earliest convenience. Please be aware that VA is currently not enrolling new applicants who fall into high income brackets unless they have a service-connected disability. Also, some veterans are required to make co-payments for care and/or medications provided by VA.

### **What You Can Discuss About The Tests**

You may be concerned about discussing your participation in mustard agent or Lewisite tests with VA or your health care provider.

On March 9, 1993 the Deputy Secretary of Defense released veterans who participated in the testing, production, transportation or storage of chemical weapons prior to 1968 from any non-disclosure restrictions. Servicemembers who participated in such tests after 1968 are permitted to discuss the chemical agents, locations, and circumstances of exposure only, because this limited information has been declassified.

### **If You Have Questions or Want to File a Claim for Benefits**

If you have been diagnosed with one of the disabilities discussed above, you should apply for VA disability compensation. If you believe you have any other medical condition that is related to your military service, you should also file a claim for disability compensation.

- To obtain further information or file a claim, call us at 1-800-749-8387 (then select option 4). You may speak to a VA representative from 9:00 a.m. to 5:00 p.m. Eastern time. You can also email us at [MUSTARDGAS@VBA.VA.GOV](mailto:MUSTARDGAS@VBA.VA.GOV). If you go to one of our regional offices, please take this letter with you.
- If you have questions about mustard agents or Lewisite, contact DoD at (800) 497-6261, Monday through Friday, 9:00 a.m. to 9:00 p.m. Eastern time.

Sincerely yours,

Daniel L. Cooper  
Under Secretary for Benefits
